

Pets and Petals

1. Pets, flowers and plants.

If you are purchasing flowers for yourself or for someone else, please note that some flowers and plants can be toxic to pets. Since we care about our furry friends and all kinds of pets, we request that you keep this in mind when ordering flowers, plants, and gifts. No matter what, you should always try to keep flowers and plants away from pets (and children) and you should be cautious when choosing the flowers to order. Given that flowers and plants are subject to occasional substitution, we suggest calling us directly with your requests. We will do our best to accommodate your needs, and you will see a pawprint sticker on items that are more pet friendly, but we cannot guarantee that the flowers or plants will be completely safe around pets. So be sure to always keep pets away from your beautiful flowers and plants, just in case. Please review trusted resources and consult your professional veterinarian before keeping any flowers or plants around pets.
